Subject: FamSoft Corporation

To Whom It May Concern:

Weyerhaeuser's Marshfield Door business unit retained FamSoft Corporation in May of 2000 to support legacy system conversions and Oracle application setups. Deliverables were completed on time, allowing for the successful startup of Marshfield Door Systems as a new business entity on December 20, 2000.

#### Scope of work

1. Provided project-planning support using Microsoft Project tools. Identified critical tasks, resource requirements, and estimates of work.
2. Setup a second operating unit including new chart of accounts, inventory, and order entry. New operating unit was setup in the existing Oracle Applications suite. This activity required extensive requirement analysis, mapping, and problem solving to integrate a highly successful process oriented business into the new organization with no disruption of service.
3. Setup Oracle Accounts Receivables and Payables to replace Weyerhaeuser's legacy systems.
4. Provide new user training and setup documentation for Oracle Order Entry, Oracle Inventory, Oracle Accounts Receivables, and Oracle Payables.
5. Provide Application Database administration to support setup of second operating unit in Oracle applications. FamSoft also provided ad-hoc Oracle system administration support due to short term staffing problems.

#### Overall

FamSoft and the Marshfield business unit have worked successfully together over the last 6 years. FamSoft employees worked diligently on the 2000 engagement and were instrumental to our success in implementing stand-alone functionality. This was consistent with previous experiences that included Oracle application setup and complex custom development during the implementation of Oracle Applications and customizations in 1995-1997, upgrades from Oracle 10.5 to 10.7 in 1998, and Y2K conversions in 1999.

If you have any questions in these regards, please feel free to contact me.
